- High School Counsellors can register for the [Counsellor Retreat](#) at Olds College on June 10. Free accommodations for the night before are available.
- **Changes to Career Safety Education:** The Sask. Safety Council does not require participating students to take Young Workers' Readiness Course, but it remains a requirement of the Saskatchewan Government for those ages 14 and 15 only. Participants who enroll in Career Safety Education will be given sequential access to the following programs: New Worker Readiness, Mental Health Resiliency, WHMIS, Hearing Protection, Industry Elective(s) of choice. Once enrolled, Career Safety Education is an automated process whereby each course can only be accessed after the pre-requisite, or previous course, is completed. This makes the system much more efficient than previous versions. If your curriculum requires the completion of Young Workers Readiness, **that is a separate requirement from our program** and not related. If you prefer that your students take only a specific industry course(s), and not participate in the system as defined above, we can modify their registrations to allow different access, however some courses such as SCOT and WAVE would no longer be available to them.

There are **2 pathways** schools can choose to participate in our free training:

- **Career Safety Education Guided Pathway** – This is a hands-off system that allows students to take 1 course at a time in a specific order to help build their knowledge at each step. They take New Worker Readiness, Mental Health Resiliency, WHMIS, Hearing Protection and lastly, an industry elective. This ensures the learner is building the knowledge at each step that can be used to help understand the next course content. (**Note: New Worker Readiness is not the same as YWRCC** offered by the Government of Saskatchewan, **New Workers Readiness provides significantly more detail in understanding risk and safety within first jobs.** YWRCC is a legal requirement for those aged 14 or 15 at the time of employment). To register for the Career Safety Education, complete the profile request form [here](#).
- **Self-Learning Pathway** – The learner is given access to all the free training, allowing them to pick and choose what courses to take based on what they need. This pathway is recommended for those that already have a foundational knowledge of workplace safety, risks, hazards, and control measures so they can comprehend the material in the courses. It is also the one used if you only want a single course or access to courses in a different sequence than is recommended. For all-access to the programs in the self-learning pathway, complete the profile request found [here](#).

What teachers responsible for young workers need to know:

- **Commonly Confused** - Young Workers Readiness Course & Career Safety Education
- **Young Workers' Readiness Course** is a single course that is required to work in Saskatchewan for those aged 14 and 15 only.
- **Career Safety Education** is a series of voluntary training courses designed to prepare new workers at all ages for employment in Saskatchewan.
